MODERN DESIGN & LIVING

REINVENTING TRENDS

A DESIRE TO INSPIRE WITH NEW DESIGNS

LUX XU reinvents trends with new concepts of furniture and lighting. After all, Modern Design with cutting-edge innovation is the key to making a statement.

To revolutionize the interior design world, we created two innovative collections. Algerone and Magna are the names to fix as they promise to revolutionize the industry with their cutting-edge designs.

Starting from above, the Magna lighting collection presents seven different fixtures, each one inspired by the raw lines and natural textures of mountains. From a statement chandelier to an imponent floor lamp, all Magna designs exhale a pendulum-like

aesthetic and an elongated trapezium form.

The other novelty, the Algerone collection, is inspired by architectural elements and has a sense of modern glamour. Most pieces are mainly composed of Statuario marble, which enhances their strong and durable character, while the grey makes them a suitable option for any contemporary interior design. A sofa with classical lines and geometric features, a rectangular dining table that showcases the strength and nature of Statuario marble, or the sleek and opulent bar cabinet that highlights a Eucalipto Frise Veneer.
